1) Power factor (cosφ)= 1 and Vac nominal.
2) THDi is lower than 3% for inverter power greater than 25%.
3) P-Q capability is semicircular with radius equal to Smax for all MPPT range.
4) From 45°C to 53°C derating of power.
5) Above 1.000 m a.s.l. derating of the power of 1% per 100 m.

Note: Each inverter must be connected separately to its own LV/MV transformer or it has to be connected to a separate LV secondary input of the LV/MV transformer. Two or more inverters cannot be connected in parallel to the same LV secondary input of the LV/MV transformer.
